

How are habitats different?

What do we need to know?

- What a microhabitat is.
- How animals get their food.
- The different stages of the butterfly life cycle.
- What is important for Muslims.

Our Class Book:

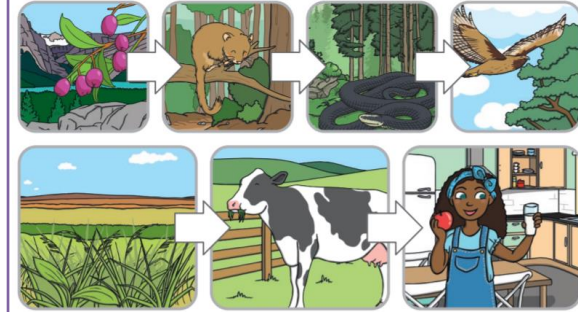

Did you know?

An animal that is on top of the food chain is called an apex predator. Orcas, lions and tigers are all apex predators.

Key Vocabulary:

Habitat	The natural place something lives
Microhabitat	A very small habitat in places like under a rock, leaves or a branch.
Depend	Many living things in a habitat depend on each other. They need each other for different things.
Food chain	Shows how each animal gets its food.
Food source	This is the place a living thing's food comes from.
Predator	A wild animal which hunts or preys on other animals for food
Metamorphosis	The dramatic change that some animals go through in their life cycle.
Mosque	A place of worship for Muslims.
Nocturnal	Active at night.

Food Chains

Butterfly Life Cycle

Islam

The Five Pillars of Islam

These are the five most important duties for Muslims.
