

How are habitats different?

What we need to know:

- That all living things need air, water and sunlight to be able to stay alive and healthy.
- To know that there are different common plants in our local area.
- All living things reproduce and have offspring
- Each living thing has a life cycle.

Basic Need:

To stay alive, all animals have 3 basic needs:

Water, lower fat milk, sugar-free drinks including tea and coffee all count.

To stop illnesses and diseases from spreading, you must be hygienic and keep yourselves clean.

Some animals give birth to **live young**. Their offspring normally look like them when they are born.

Did you know?

- Some animals give birth to live young. Their offspring normally look like them when they are born.
- Other animals have offspring that do not look like them when they are born i.e. fish and amphibians.
